Acme Corporation

RE: Internship Software Engineer

Dear Hiring Manager,

I am excited to apply for the Internship Software Engineer position at Acme Corporation, which I discovered on your careers page. With a strong foundation in software development and a passion for innovative technology, I am eager to contribute to your team and learn from industry leaders at Acme.

During my time at university, I successfully completed a project where I developed a web application that streamlined the process of project management for student organizations. This project not only enhanced my skills in JavaScript and React but also taught me the importance of user experience and design. Additionally, I interned last summer at Tech Solutions, where I collaborated with a team of engineers to design a mobile app that improved communication among remote teams. This experience strengthened my ability to work in a fast-paced environment and adapt quickly to new technologies and frameworks.

I am particularly drawn to Acme Corporation because of your commitment to innovation and excellence in software solutions. I am confident that my technical skills, combined with my dedication to learning and growing, would allow me to make meaningful contributions to your projects. I would appreciate the opportunity to discuss how my background, skills, and enthusiasms align with the goals of your team. Thank you for considering my application.

Sincerely,

Jordan A. Smith
