Acme Corporation

RE: Internship Technical Architect

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Technical Architect position at Acme Corporation, which I discovered through your careers page. As a current computer science student at State University, I have developed a strong foundation in software architecture design and cloud computing, making me well-suited for this role. I am particularly excited about the opportunity to contribute to Acme's innovative projects and collaborate with a talented team.

During my studies, I successfully led a team project where we designed and implemented a microservices architecture for a web application that streamlined internal workflows for a local non-profit organization. By utilizing Docker and Kubernetes, we achieved a deployment time reduction of 40%, significantly improving the efficiency of their operations. Additionally, I completed an internship at Tech Solutions Inc., where I assisted in migrating legacy systems to a cloud-based infrastructure. This project not only honed my technical skills but also deepened my understanding of enterprise architecture principles and their real-world applications.

I am eager to bring my technical knowledge and collaborative spirit to Acme Corporation while further developing my skills under the guidance of your experienced team. I am particularly impressed by your commitment to leveraging cutting-edge technologies to drive business solutions, and I would love the chance to discuss how I can contribute to your ongoing success. Thank you for considering my application. I look forward to the opportunity to discuss my candidacy further.

Sincerely,

Jordan R. Thompson
