Acme Corporation

RE: Internship Test Engineer

Dear Hiring Manager,

I am excited to apply for the Internship Test Engineer position at Acme Corporation, which I discovered through my university's career portal. With a strong foundation in software development and a passion for quality assurance, I am eager to contribute to your team and help ensure the delivery of top-notch products.

During my recent project at university, I led a team of three in developing a web application for a local business, where I implemented a comprehensive testing strategy that included both manual and automated tests. By utilizing tools such as Selenium and JUnit, we were able to reduce the number of reported bugs by 30% before the launch. Additionally, I completed an internship at Tech Innovations, where I assisted in the quality assurance of a mobile application, conducting regression testing and documenting defects. My efforts contributed to a successful product release and increased customer satisfaction ratings by 15% in subsequent surveys.

I am particularly drawn to Acme Corporation due to its commitment to innovation and excellence in technology. I am eager to bring my analytical skills and attention to detail to your esteemed team. I am looking forward to the opportunity to discuss how my background and passion for quality assurance can align with the goals of Acme Corporation. Thank you for considering my application.

Sincerely,

Jessica Lee
