Acme Corporation

RE: Internship Toxicologist

Dear Hiring Manager,

I am excited to apply for the Internship Toxicologist position at Acme Corporation, which I discovered on your careers page. With a strong academic background in toxicology and a passion for environmental safety, I am eager to contribute to your team and further develop my skills in a dynamic and innovative environment.

During my undergraduate studies in Environmental Science at the University of California, I successfully conducted a research project assessing the impacts of heavy metal pollutants on local aquatic ecosystems. This project not only honed my analytical skills but also provided me with hands-on experience in laboratory techniques, including chromatography and spectrophotometry. Additionally, I interned at EcoSolutions, where I assisted the toxicology team in evaluating the safety of new chemical compounds, leading to the identification of a previously unnoticed toxic effect in a widely used pesticide. This experience taught me the importance of rigorous testing and data analysis in risk assessment and regulatory compliance.

I am particularly drawn to Acme Corporation's commitment to sustainable practices and innovative research in toxicology. I am eager to bring my analytical skills and attention to detail to your internship program, where I hope to contribute to ongoing projects and learn from your team of experts. I am confident that my academic background and hands-on experience will allow me to make a meaningful impact during my internship.

I would appreciate the opportunity to discuss my application further and explore how I can support your team at Acme Corporation. Thank you for considering my application; I look forward to the possibility of contributing to your important work in toxicology.

Sincerely,

Jordan A. Thompson
