Acme Corporation

RE: Internship Web Designer

Dear Hiring Manager,

I am excited to apply for the Internship Web Designer position at Acme Corporation, which I discovered on your careers page. As a passionate design student with a strong interest in creating visually engaging and user-friendly websites, I believe that my skills and experiences align perfectly with the requirements of this role.

During my time at university, I successfully completed a project where I designed a responsive website for a local nonprofit organization. This involved conducting user research, creating wireframes, and implementing the design using HTML, CSS, and JavaScript. The final product increased the organization's online engagement by 30% within the first month of launch, which reinforced my belief in the impact that thoughtful design can have on user experience. Additionally, I participated in a hackathon where our team developed a prototype for an educational app, focusing on intuitive navigation and accessibility. Our project was recognized as one of the top three entries, which further fueled my passion for web design.

I am eager to bring my creativity and technical expertise to Acme Corporation and collaborate with your talented team. I am particularly impressed by your commitment to innovative design solutions and user-centered approaches, and I am eager to learn from the best in the industry. I would love the opportunity to discuss how I can contribute to your projects and grow within your esteemed organization. Thank you for considering my application.

Sincerely,

Jordan Taylor
