Acme Corporation
RE: Internship Welder

Dear Hiring Manager,

I am excited to apply for the Internship Welder position at Acme Corporation, which I discovered on your careers page. As a current welding student at the Technical Institute of Technology, I am eager to gain hands-on experience in a dynamic and innovative environment such as yours. With a strong foundation in various welding techniques and a passion for craftsmanship, I am keen to contribute to your team while further developing my skills.

During my studies, I successfully completed a project where I collaborated with classmates to design and construct a custom metal sculpture that was showcased at our annual art exhibit. This experience not only honed my technical skills in MIG and TIG welding but also taught me the importance of teamwork and effective communication. Additionally, I earned recognition for my precision in creating welds that met stringent quality standards during a competitive skills assessment, which has fueled my determination to excel in the field.

I am particularly drawn to Acme Corporation's commitment to innovation and excellence in metal fabrication. I am eager to learn from your experienced team and contribute to projects that push the boundaries of quality and creativity. I am confident that my strong work ethic and proactive approach will make me a valuable asset during my internship.

I would appreciate the opportunity to discuss how my background, skills, and enthusiasm align with the needs of your team. Thank you for considering my application. I look forward to the possibility of contributing to Acme Corporation and learning from the best in the industry.

Sincerely,

Jordan Taylor
