Acme Corporation

RE: No Experience Automation Controls Engineer

Dear Hiring Manager,

Dear Hiring Manager,

I am excited to apply for the No Experience Automation Controls Engineer position at Acme Corporation, as advertised on your careers page. With a strong academic background in Electrical Engineering and a passion for automation technologies, I am eager to contribute to your innovative team and help drive your automation projects to success.

During my studies at State University, I completed a capstone project focused on designing an automated irrigation system using PLC programming. This experience not only honed my technical skills but also taught me the importance of collaborative problem-solving, as I worked closely with a diverse team to troubleshoot and optimize our system. Additionally, I interned at XYZ Tech, where I assisted in the implementation of a manufacturing process automation that improved efficiency by 15%. This role required me to learn quickly and adapt to various control systems, further solidifying my interest in automation controls.

I am particularly impressed with Acme Corporation's commitment to advancing automation solutions across various industries. I believe that my dedication to continual learning and my proactive approach to tackling challenges would align well with your team's objectives. I am enthusiastic about the opportunity to bring my skills to Acme and further develop my engineering expertise in a real-world setting.

I would be grateful for the opportunity to discuss how my background, education, and enthusiasm for automation can contribute to the ongoing success of Acme Corporation. Thank you for considering my application, and I look forward to the possibility of discussing my candidacy further.

Sincerely,

Jordan Alex Thompson
