Acme Corporation

RE: No Experience Devops Engineer

Dear Hiring Manager,

I am writing to express my enthusiasm for the No Experience Devops Engineer position at Acme Corporation, which I discovered on your careers page. As a recent graduate with a degree in Computer Science and a strong passion for cloud computing and automation, I am excited about the opportunity to contribute to your team and help streamline operations through innovative solutions.

During my academic career, I completed a comprehensive project where I successfully implemented a continuous integration and continuous deployment (CI/CD) pipeline for a web application using GitHub Actions and AWS. This experience provided me with hands-on knowledge of automating build processes and deploying applications efficiently. Additionally, I interned at a local tech startup, where I collaborated with developers and system administrators to optimize server configurations, resulting in a 20% improvement in application response time. These experiences have equipped me with a solid foundation in DevOps principles, even without formal work experience in the field.

I am particularly drawn to Acme Corporation due to its commitment to innovation and excellence in technology solutions. I am eager to bring my technical skills and proactive mindset to your team. I am confident that my ability to learn quickly and adapt to new tools will allow me to make meaningful contributions from day one. I would welcome the opportunity to further discuss how my background, skills, and enthusiasm align with the goals of your team. Thank you for considering my application.

Sincerely,

Jordan Taylor
