Acme Corporation

RE: No Experience Devsecops Engineer

Dear Hiring Manager,

I am excited to apply for the No Experience Devsecops Engineer position at Acme Corporation, as advertised on your careers page. With a strong foundation in software development and a keen interest in cloud security practices, I am eager to contribute to your team and help enhance the security and efficiency of your applications.

During my time at university, I developed a robust understanding of programming and systems architecture through various projects. For instance, I led a team project where we designed a secure web application using AWS, which involved integrating automated security testing tools to identify vulnerabilities early in the development process. This experience not only honed my technical skills but also taught me the importance of incorporating security into the software development lifecycle. Additionally, I completed an internship at a local tech startup where I assisted in implementing CI/CD pipelines using Jenkins, which improved deployment efficiency by 30%. My hands-on experience with these tools has sparked my passion for DevSecOps, and I am eager to further develop my skills in this area.

I am particularly impressed by Acme Corporation's commitment to innovation and security, and I believe my proactive approach and eagerness to learn will make me a valuable addition to your team. I am very interested in discussing how my background, skills, and enthusiasm align with the goals of Acme Corporation. Thank you for considering my application; I look forward to the opportunity to speak with you.

Sincerely,

Jordan Smith
