Acme Corporation

RE: No Experience Hardware Engineer

Dear Hiring Manager,

I am writing to express my enthusiasm for the No Experience Hardware Engineer position at Acme Corporation, which I discovered on your careers page. As a recent graduate in Electrical Engineering from State University, I am excited about the opportunity to contribute my skills and my passion for hardware design to a company known for its innovation and commitment to excellence in the tech industry.

During my academic career, I completed a senior design project that involved creating a prototype for an energy-efficient power supply. This project not only honed my technical skills in circuit design and simulation using software such as LTspice and Altium Designer, but also allowed me to work collaboratively in a team environment where we successfully presented our findings to faculty and industry professionals. Additionally, I interned at Tech Solutions, where I assisted in testing and troubleshooting hardware components, enhancing my problem-solving abilities and reinforcing my understanding of hardware functionality and reliability.

I am particularly drawn to Acme Corporation because of its commitment to pioneering advanced hardware solutions. I am eager to bring my strong analytical skills and innovative mindset to your team. I am looking forward to the possibility of discussing how my background, skills, and enthusiasm align with the goals of Acme Corporation. Thank you for considering my application.

Sincerely,

Jordan Smith
