Acme Corporation

RE: No Experience Ux Researcher

Dear Hiring Manager,

I am excited to apply for the No Experience UX Researcher position at Acme Corporation, which I discovered on your careers page. With a strong passion for understanding user needs and behaviors, I am eager to contribute my skills to a dynamic team that prioritizes user-centric design.

Although I am new to the field of UX research, I have honed relevant skills through my academic projects and personal initiatives. During my time at university, I conducted a comprehensive usability study for a local non-profit organization, which involved analyzing user feedback and identifying pain points in their online donation platform. As a result, I was able to present actionable recommendations that improved user experience and increased donations by 15% over a three-month period. Additionally, in a group project, I collaborated with peers to create wireframes for a mobile application tailored to students, where my focus was on gathering user feedback through surveys and interviews to refine our design approach.

I am particularly drawn to Acme Corporation because of your commitment to innovative solutions and user satisfaction. I am enthusiastic about the opportunity to learn from experienced professionals and contribute fresh perspectives to your UX research initiatives. I am eager to discuss how my background and skills can benefit your team further. Thank you for considering my application.

Sincerely,

Jordan Smith
