Acme Corporation

RE: No Experience Web Developer

Dear Hiring Manager,

I am excited to apply for the No Experience Web Developer position at Acme Corporation, which I discovered through your careers page. As a recent graduate with a degree in Computer Science, I am eager to bring my enthusiasm for web development to your team and contribute to the innovative projects at Acme Corporation.

During my studies, I successfully completed a capstone project where I developed a responsive website for a local non-profit organization. This project not only honed my skills in HTML, CSS, and JavaScript but also taught me the importance of user-centered design. I collaborated with a team of four peers, where we conducted user research and implemented feedback into our design process, resulting in a 30% increase in user engagement for the non-profit. Additionally, I have independently built several personal projects, including a portfolio website, which showcases my ability to create visually appealing and functional web applications.

I am particularly drawn to this role at Acme Corporation because of your commitment to fostering new talent and innovation in web development. I am eager to learn from industry professionals and contribute to a company that values creativity and collaboration. I am confident that my foundational knowledge and proactive approach to learning will allow me to integrate quickly into your team.

I would love the opportunity to further discuss how my background and skills align with the needs of your team at Acme Corporation. Thank you for considering my application. I look forward to the possibility of contributing to your exciting projects and growing as a web developer under your guidance.

Sincerely,

Jordan Taylor
