SUMMARY

Detail-oriented Automation Engineer with over 5 years of experience in designing and implementing automated systems. Proven track record of improving efficiency and reducing costs through innovative solutions and continuous process improvements.

EXPERIENCE

Senior Automation Engineer

Jan 2022 - Present

Tech Innovations Inc., San Francisco, CA

- Led the automation of a critical deployment pipeline, reducing deployment time by 40% and increasing throughput by 25%.
- Developed test automation frameworks using Selenium and Jenkins, resulting in a 30% decrease in regression testing time.
- Collaborated with cross-functional teams to identify automation opportunities, saving the company approximately \$100,000 annually.

Automation Engineer

Jun 2018 - Dec 2021

NextGen Solutions, Los Angeles, CA

- Implemented automated testing for web applications, leading to a 50% reduction in production defects.
- Designed and executed automation scripts using Python and Robot Framework, increasing testing efficiency by 60%.
- Streamlined CI/CD processes, decreasing build times by 20% through effective tooling and optimization.

Junior Automation Engineer

May 2016 - May 2018

Future Tech Corp., San Diego, CA

- Assisted in the development of automation scripts for manual testing processes, improving overall test coverage by 35%.
- Participated in Agile ceremonies and contributed to sprint planning, creating a more effective workflow.
- Trained new team members on automation best practices, enhancing team productivity.

EDUCATION

Bachelor of Science in Computer Engineering

May 2018

University of California, Berkeley, Berkeley, CA • GPA: 3.7

SKILLS

Technical Skills: Automation Testing, Continuous Integration/Continuous Deployment (CI/CD), Selenium, Python

Tools & Frameworks: Jenkins, Robot Framework, Git, Docker
