SUMMARY

Blockchain Developer with over 5 years of experience in designing and implementing decentralized applications. Proficient in smart contract development and blockchain architecture, with a strong focus on security and scalability.

EXPERIENCE

Senior Blockchain Developer

Jan 2022 - Present

Crypto Innovations Inc., San Francisco, CA

- Led the development of a decentralized finance (DeFi) platform that increased user acquisition by 40% in 6 months.
- Implemented a multi-signature wallet solution saving the company \$200,000 in potential fraud losses.
- Developed and deployed over 20 smart contracts on Ethereum, ensuring compliance with ERC-20 standards.

Blockchain Developer

Jun 2019 - Dec 2021

Tech Solutions Corp., San Jose, CA

- Created a supply chain tracking system using Hyperledger Fabric, reducing logistics costs by 30%.
- Collaborated with a team to enhance blockchain security protocols, decreasing vulnerabilities by 50%.
- Developed APIs for blockchain integration with existing enterprise systems, improving data access speed by 25%.

Junior Blockchain Developer

May 2018 - May 2019

Innovative Blockchain LLC, Los Angeles, CA

- Assisted in the development of a cryptocurrency wallet application that supported 15+ cryptocurrencies.
- Conducted code audits on smart contracts, reducing errors by 20% before deployment.
- Participated in hackathons, achieving 2nd place for a blockchain-based voting system prototype.

EDUCATION

Bachelor of Science in Computer Science

May 2018

University of California, Berkeley, Berkeley, CA • GPA: 3.7

SKILLS

Technical Skills: Solidity, JavaScript, Node.js, Smart Contracts

Tools & Frameworks: Ethereum, Hyperledger Fabric, Truffle, Ganache
