SUMMARY

Detail-oriented C++ Developer with over 5 years of experience in designing efficient applications. Proven track record in optimizing performance and delivering high-quality software solutions on time.

EXPERIENCE

Senior C++ Developer
Jan 2022 - Present

Tech Innovations Inc., San Francisco, CA

- Increased application performance by 30% through code optimization and efficient algorithm implementation.
- Led a team of 5 developers in a project that delivered a new software product ahead of schedule, resulting in a $200,000 increase in annual revenue.
- Utilized C++11 features to improve code maintainability and reduce technical debt.

C++ Developer
Jun 2018 - Dec 2021

NextGen Solutions, Los Angeles, CA

- Developed a multi-threaded application that reduced processing time by 40%, enhancing the overall user experience.
- Collaborated with cross-functional teams to integrate software solutions, improving project delivery timelines by 25%.
- Implemented unit tests that increased code coverage to 85%, ensuring higher software quality.

Junior C++ Developer
Jul 2016 - May 2018

Innovatech Corp., Seattle, WA

- Assisted in the development of a real-time data processing application, achieving a 20% reduction in latency.
- Contributed to a team that successfully migrated legacy systems to modern C++ frameworks, improving application stability.
- Provided technical support and resolved bugs, contributing to a 15% decrease in user-reported issues.

EDUCATION

Bachelor of Science in Computer Science
May 2018

University of California, Berkeley, Berkeley, CA • GPA: 3.7

SKILLS

Technical Skills: C++, Data Structures, Algorithms, Multi-threading

Tools & Frameworks: Git, Visual Studio, CMake
