SUMMARY

Detail-oriented Cloud Security Engineer with over 5 years of experience in securing cloud environments. Proven ability to implement robust security measures and reduce vulnerabilities, enhancing overall system integrity.

EXPERIENCE

Cloud Security Engineer

Jan 2022 - Present

TechSecure Solutions, San Francisco, CA

- Developed and implemented a cloud security framework that reduced security incidents by 40% within the first year.
- Led a team to migrate 60+ applications to secure cloud infrastructure, saving the company \$500K in potential breaches.
- Utilized AWS Security Hub and Azure Security Center for continuous monitoring, improving threat detection response time by 30%.

Cloud Security Analyst

May 2019 - Dec 2021

Innovatech Systems, Los Angeles, CA

- Conducted security assessments and audits for cloud services, identifying and mitigating risks that led to a 25% decrease in vulnerabilities.
- Implemented Identity and Access Management (IAM) policies across AWS and Azure environments, enhancing compliance and user access control.
- Collaborated with DevOps teams to integrate security into CI/CD pipelines, reducing deployment times by 15%.

IT Security Specialist

Jun 2018 - Apr 2019

SecureNet Corp, Seattle, WA

- Assisted in developing incident response plans that decreased average response time to incidents by 20%.
- Monitored network security and cloud configurations, resulting in a 30% reduction in potential threats.
- Trained 50+ employees on cloud security best practices, improving overall security awareness.

EDUCATION

Bachelor of Science in Computer Science

May 2018

University of California, Berkeley, Berkeley, CA • GPA: 3.7

SKILLS

Technical Skills: Cloud Security Architecture, Vulnerability Assessment, Incident Response, Identity and Access Management (IAM)

Tools & Frameworks: AWS Security Services, Azure Security Center, Terraform, Kubernetes Security
