SUMMARY

Motivated and detail-oriented Entry Level AI Engineer with a strong foundation in machine learning and data analysis. Proven ability to leverage programming skills and analytical thinking to develop innovative solutions and enhance operational efficiency.

EXPERIENCE

AI Intern

Jun 2022 - Present

Tech Innovations Inc., San Francisco, CA

- Developed a machine learning model that improved prediction accuracy by 25%, leading to a 15% increase in sales forecasting efficiency.
- Collaborated with a team of data scientists to implement a natural language processing tool, resulting in a 40% reduction in customer query response time.
- Utilized Python and TensorFlow to analyze datasets and train models, enhancing data-driven decision-making processes.

Data Science Intern

Jan 2021 - May 2022

Data Solutions Corp., San Jose, CA

- Assisted in the design and implementation of data visualization dashboards using Tableau, improving reporting speed by 30%.
- Conducted exploratory data analysis on large datasets, identifying key trends that informed strategic initiatives.
- Supported the migration of data pipelines to AWS, resulting in a 20% reduction in data processing time.

Research Assistant

Sep 2018 - May 2021

University of California, Berkeley, Berkeley, CA

- Participated in a research project focused on reinforcement learning, contributing to a paper published in a peer-reviewed journal.
- Implemented algorithms in Python, which improved simulation speed by 15% during testing phases.
- Assisted in the preparation of presentations and reports for academic conferences, enhancing communication of complex concepts.

EDUCATION

Bachelor of Science in Computer Science

May 2021

University of California, Berkeley, Berkeley, CA • GPA: 3.7

SKILLS

Technical Skills: Python, Machine Learning, Data Analysis, Natural Language Processing

Tools & Frameworks: TensorFlow, AWS, Tableau, Git
