SUMMARY

Detail-oriented and analytical Entry Level Data Scientist with a strong foundation in statistical analysis and machine learning. Proficient in Python and R, with a proven ability to derive insights from complex datasets to drive business solutions.

EXPERIENCE

Data Science Intern

Jun 2022 - Present

Tech Innovations Inc., San Francisco, CA

- Developed predictive models that improved customer retention by 15%, resulting in an estimated \$50,000 increase in annual revenue.
- Collaborated with cross-functional teams to analyze user behavior, leading to a 20% reduction in churn rates through targeted marketing strategies.
- Utilized Python and SQL to clean and analyze large datasets, enhancing data accuracy and reporting efficiency by 30%.

Data Analyst Intern

Jan 2022 - May 2022

Analytics Solutions LLC, Los Angeles, CA

- Assisted in the creation of dashboards using Tableau, providing real-time insights that improved decision-making processes across departments.
- Conducted exploratory data analysis (EDA) on sales data, identifying trends that increased sales forecasting accuracy by 25%.
- Automated data collection processes, reducing manual input time by 40 hours per month.

Research Assistant

Sep 2020 - May 2021

University Research Lab, City, State

- Supported research on machine learning algorithms, contributing to a project that achieved a 10% improvement in prediction accuracy.
- Developed visualizations for research findings, enhancing presentation effectiveness for academic conferences.
- Collaborated with a team to publish research findings in a peer-reviewed journal, improving lab visibility in academic circles.

EDUCATION

Bachelor of Science in Data Science

May 2021

University of California, Berkeley, Berkeley, CA • GPA: 3.8

SKILLS

Technical Skills: Python, R, SQL, Machine Learning

Tools & Frameworks: Tableau, Pandas, NumPy, Scikit-learn
