SUMMARY

Dedicated Environmental Scientist with over 5 years of experience in environmental assessment and restoration. Proven track record in utilizing GIS technology and data analysis to enhance project outcomes and drive sustainable practices.

EXPERIENCE

Environmental Scientist

Jan 2022 - Present

Green Solutions Inc., Seattle, WA

- Led a team to conduct environmental impact assessments for 10+ large-scale projects, resulting in a 25% reduction in compliance violations.
- Developed a data-driven monitoring system that improved project reporting efficiency by 30%, saving the company approximately \$50,000 annually.
- Utilized GIS and remote sensing technologies to evaluate land use changes and recommend sustainable practices.

Junior Environmental Consultant

May 2018 - Dec 2021

Ecological Advisors, Portland, OR

- Assisted in the completion of over 20 environmental assessments, ensuring adherence to local and federal regulations.
- Contributed to a habitat restoration project that improved biodiversity in the area by 40% within two years.
- Collaborated with stakeholders to develop sustainable land use strategies, securing funding of \$200,000 for ongoing projects.

Research Assistant

Sep 2016 - May 2018

University of Washington, Department of Environmental Science, Seattle, WA

- Conducted field studies on water quality and soil contamination, leading to a published research paper in a peer-reviewed journal.
- Implemented statistical analysis using R to assess the impact of urban runoff on local waterways.
- Supported grant writing efforts that resulted in \$150,000 in research funding.

EDUCATION

Bachelor of Science in Environmental Science

May 2018

University of Washington, Seattle, WA • GPA: 3.7

SKILLS

Technical Skills: Environmental Impact Assessment, GIS & Remote Sensing, Data Analysis, Statistical Modeling

Tools & Frameworks: ArcGIS, R, Python, AutoCAD
