SUMMARY

Detail-oriented Automation Engineer with over 5 years of experience in designing and implementing automated testing solutions. Proven track record of improving software quality and reducing testing time through innovative automation strategies.

EXPERIENCE

Automation Engineer

Jan 2022 - Present

Tech Innovations Inc., San Francisco, CA

- Implemented a CI/CD pipeline that reduced deployment time by 30%, enhancing team productivity.
- Designed and executed automated tests using Selenium and TestNG, increasing test coverage by 40%.
- Collaborated with cross-functional teams to integrate automation tools which improved overall application performance.

Software Tester

Jun 2019 - Dec 2021

Global Solutions Ltd., Los Angeles, CA

- Developed automated testing scripts that decreased manual testing efforts by 50%, saving approximately \$25,000 annually.
- Led a team of 3 in automation project targeting legacy systems, successfully migrating 60% of tests to automated frameworks.
- Conducted training sessions for junior testers in automation tools, improving team skill set and efficiency.

Quality Assurance Engineer

May 2018 - May 2019

NextGen Technologies, San Diego, CA

- Created and maintained automated test scripts, resulting in a 20% reduction in testing cycle time.
- Participated in Agile development sprints, contributing to 3 successful product releases on time.
- Utilized JIRA for tracking bugs and enhancements, enhancing communication within the development team.

EDUCATION

Bachelor of Science in Computer Engineering

May 2018

University of California, Berkeley, Berkeley, CA • GPA: 3.7

SKILLS

Technical Skills: Selenium, Java, Python, SQL

Tools & Frameworks: Jenkins, JUnit, TestNG, JIRA
