SUMMARY

Detail-oriented Azure Architect with over 5 years of experience in designing and implementing cloud solutions. Proven track record in optimizing cloud applications, resulting in a 30% reduction in costs and a 25% improvement in system performance.

EXPERIENCE

Azure Solutions Architect

Jan 2022 - Present

Tech Innovations Inc., Seattle, WA

- Led the migration of over 50 on-premise applications to Azure, reducing operational costs by \$200,000 annually.
- Developed and implemented a CI/CD pipeline using Azure DevOps, reducing deployment times by 40%.
- Collaborated with cross-functional teams to design architecturally sound solutions, enhancing overall system performance by 25%.

Cloud Engineer

Jun 2019 - Dec 2021

Cloud Solutions LLC, Portland, OR

- Automated infrastructure deployment using Terraform, resulting in a 50% decrease in setup time.
- Managed Azure resources to ensure high availability, achieving 99.9% uptime across all applications.
- Implemented monitoring solutions using Azure Monitor, increasing incident response times by 30%.

Junior Cloud Developer

Aug 2018 - May 2019

Innovative Tech Corp., San Francisco, CA

- Assisted in the development of cloud-native applications using .NET Core and Azure Functions.
- Participated in Agile development processes, improving team efficiency by 20%.
- Contributed to the creation of RESTful APIs, enhancing service integration across platforms.

EDUCATION

Bachelor of Science in Computer Science

May 2018

University of Washington, Seattle, WA • GPA: 3.7

SKILLS

Technical Skills: Azure Architecture, Cloud Migration, DevOps, Infrastructure as Code

Tools & Frameworks: Azure DevOps, Terraform, Kubernetes, Docker
