SUMMARY

Detail-oriented Mid Level Data Engineer with 5 years of experience in designing and optimizing data pipelines. Proficient in leveraging advanced data processing technologies to extract valuable insights and drive business decisions.

EXPERIENCE

Data Engineer

Jan 2022 - Present

Tech Innovations Inc., San Francisco, CA

- Designed and implemented ETL processes that improved data processing time by 40%, enabling faster reporting and analytics.
- Collaborated with data scientists to develop predictive models, leading to a 25% increase in customer retention rates.
- Managed and optimized a cloud-based data warehouse using Amazon Redshift, reducing storage costs by 20%.

Junior Data Engineer

Jun 2018 - Dec 2021

Data Solutions LLC, Los Angeles, CA

- Assisted in the migration of legacy data systems to a modern data architecture, achieving a 30% reduction in data latency.
- Developed automated data quality checks that decreased data errors by 50%, ensuring data integrity for analytics.
- Utilized Python and SQL to create data pipelines, facilitating the integration of diverse data sources for more comprehensive reporting.

Data Analyst Intern

Jan 2018 - May 2018

Analytics Hub, San Diego, CA

- Conducted data cleaning and preprocessing tasks that improved data availability for analysis by 35%.
- Created visualizations and reports using Tableau, enhancing data presentation for stakeholder meetings.

EDUCATION

Bachelor of Science in Computer Science

May 2018

University of California, Berkeley, Berkeley, CA • GPA: 3.7

SKILLS

Technical Skills: Python, SQL, Spark, ETL Processes

Tools & Frameworks: AWS, Apache Airflow, Tableau
