SUMMARY

Detail-oriented Telecommunications Engineer with over 5 years of experience in designing and implementing advanced telecommunication systems. Proven track record in optimizing network performance and delivering projects on time and within budget.

EXPERIENCE

Telecommunications Engineer

Jan 2022 - Present

Innovative Tech Solutions, San Francisco, CA

- Increased network efficiency by 25% through the implementation of a new VoIP system.
- Managed a \$500K project to upgrade the company's fiber optic infrastructure, completed 2 months ahead of schedule.
- Conducted in-depth site surveys and feasibility studies leading to a 40% reduction in installation costs.

Network Engineer

Jun 2019 - Dec 2021

Global Connect Services, Los Angeles, CA

- Led a team to deploy a new LTE network across multiple sites, achieving a 99% uptime rate.
- Reduced latency by 30% through network optimization and configuration adjustments.
- Spearheaded the transition to cloud-based networking solutions, saving the company approximately \$200K annually.

Junior Telecommunications Engineer

Jul 2018 - May 2019

TechWave Communications, San Diego, CA

- Assisted in the design and deployment of a wireless network that improved coverage by 50% in urban areas.
- Participated in regular troubleshooting and maintenance, leading to a 15% reduction in service outages.
- Collaborated on a project improving customer service response times by developing a new ticketing system.

EDUCATION

Bachelor of Science in Telecommunications Engineering

May 2018

University of California, Berkeley, Berkeley, CA • GPA: 3.7

SKILLS

Technical Skills: VoIP Systems, Fiber Optics, LTE Network Design, Network Optimization

Tools & Frameworks: Cisco Routers, Juniper Networks, NetFlow Analyzer
